

ANURAG KUMAR BHARTI

Software Engineer | Electrical & Automation Engineer 📍 Varanasi, India 📱 akbanurag.vercel.app

🌐 linkedin.com/in/anuragkumarbharti 🐙 github.com/i-akb25 ✉ anuragbhartiee25@gmail.com

Professional Summary

Engineer working across software systems, electrical automation, and applied AI. Hands-on experience spans production web development, industrial electrical systems, computer vision, autonomous systems, and end-to-end product engineering.

Education

National Institute of Technology Patna

Dec 2021 – June 2025

Bachelor of Technology in Electrical Engineering

Patna, India

Experience

JSW Steel Limited

Aug 2025 – Dec 2025

Graduate Engineer Trainee – Electrical & Automation

Dolvi, Maharashtra

- Worked with the Electrical & Automation team during industrial expansion activities, monitoring power-distribution equipment and recording operational data for engineering review.
- Assisted with electrical testing, equipment inspection, operational monitoring, and safety activities around transformers, PDBs, and industrial electrical systems.

Remote Intern

Feb 2025 – Jun 2025

Web Development Intern – MERN Stack

Maharashtra

- Developed and maintained full-stack web applications using React, Node.js, Express.js, MongoDB, REST APIs, and modern frontend tooling. Worked with Git-based development, CI/CD workflows, debugging, and production deployments.

North Bihar Power Distribution Company Ltd.

Jun 2023 – Jul 2023

Industrial Trainee

Bettiah, Bihar

- Gained field experience in operation and maintenance of a 33/11 kV distribution substation, including transformers, switchgear, protection, and control systems. Studied substation monitoring, PD workflows, and operational safety practices.

Selected Projects

AKB Studio | *Next.js 16, React 19, TypeScript, PostgreSQL, Prisma, AI, PWA* | Live | GitHub

2026

- Designed and built a production-oriented personal engineering platform combining project case studies, technical publishing, professional identity, search, contact workflows, and a private management system.
- Engineered a server-first Next.js architecture with structured content, PostgreSQL/Prisma-backed features, security controls, SEO, PWA/offline capabilities, and deployment automation.

VEYRA – Job Intelligence Platform | *Next.js, TypeScript, Job Search, Resume Analysis* | Live | GitHub

2026

- Built a privacy-focused job intelligence platform for discovering and comparing software, electrical, automation, management, government, remote, and international opportunities across multiple sources.
- Implemented resume-based job discovery, explainable matching, role and location filtering, vacancy verification, exports, watchlists, and local-first handling of personal job-search data.

Automated Drone Delivery System | *Python, Raspberry Pi, Pixhawk, OpenCV, DroneKit, MAVLink* | GitHub

2024

- Built an autonomous delivery-drone prototype integrating Pixhawk flight control, Raspberry Pi edge computing, GNSS navigation, telemetry, and Python-based mission logic.
- Integrated computer-vision-based recipient recognition with automated delivery logic and implemented mission control using DroneKit and MAVLink, including navigation and return-to-launch behavior.

ADHAYAN – Real-Time E-Classroom | *React, Node.js, MongoDB, WebRTC, Socket.IO* | Live | GitHub

2024 – 2025

- Developed a full-stack collaborative learning platform with live video communication, real-time messaging, authentication, and interactive classroom functionality.
- Integrated WebRTC and Socket.IO for real-time communication and implemented token-based authentication for protected application workflows.

Technical Skills

Languages: TypeScript, JavaScript, Python, C/C++, Java, SQL

Web & Backend: Next.js, React, Node.js, Express.js, REST APIs, WebSockets, WebRTC, Tailwind CSS

Data & Infrastructure: PostgreSQL, Prisma, MongoDB, MySQL, Docker, Git, GitHub Actions, CI/CD

AI & Systems: Applied AI, Computer Vision, OpenCV, System Architecture, API Integration

Electrical & Embedded: Electrical Systems, Automation, Control Systems, Electrical Machines, Raspberry Pi, Arduino, ESP32, Pixhawk, MAVLink

Achievements

- Team ByteBlitz placed among the **Top 25** teams at Hack O Fest 2024.
- Represented NIT Patna in an autonomous drone delivery challenge organized by Startup Bihar.
- Led technical and design activities with the TESLA Club, NIT Patna, including drone workshops, robotics initiatives, and engineering events.

Extracurricular Experience

Technical and Design Head | *TESLA Club, NIT Patna*

December 2022 – May 2025

Technical and Management Head | *Robotics Club, NIT Patna*

October 2022 – April 2025
